Oxygen Pro 25, Oxygen Pro 49, Oxygen Pro 61

Latest Firmware/Feature Version: 2.1.2

Latest Firmware/Feature Updater Application: Windows: v1.0.0, macOS: 1.0.0

Release Date: November 14, 2022

Minimum System Requirements

- Windows 8.1 or later (32- or 64-bit)
- macOS 10.13.6 or later
- Host USB 2.0 port

Firmware/Feature Update Instructions

Windows Update Instructions

> **IMPORTANT:** Close all open applications on the computer you will be using to perform the update.

> **IMPORTANT:** Use the Oxygen Pro Preset Editor to backup and save any Presets or DAW presets you've created. This update will revert your Oxygen Pro to its factory settings.

1. Connect your Oxygen Pro keyboard to your computer's USB port, and ensure Oxygen Pro is **powered off** and your computer is **powered on**.

2. On your Oxygen Pro keyboard, press and hold the **SHIFT**, **BANK <**, and **BANK >** buttons, and while continuing to press and hold the buttons, power on your Oxygen Pro.

   - **Notice:** Your Oxygen Pro will now display "**Oxygen Series Updating**" on its screen.

3. Double-click the **OXYGEN PRO ## Firmware Update.exe**. A Windows prompt may appear asking if you trust this application to make changes to your device. Select **Yes**. Wait for C++ to update (this may take several minutes).

4. Once the **Oxygen Pro Firmware Updater** is open, click the folder icon and then locate and select the **Oxygen Pro ##_V2.1.2** file.

5. In the **Oxygen Pro Series Firmware Updater**, select "Update".

6. After the updater confirms the update is successfully completed, click "OK".

7. Power off your Oxygen Pro keyboard.

8. On your Oxygen Pro keyboard, press and hold the **Octave – and +** buttons, and while continuing to press and hold the buttons, power on your Oxygen Pro.

   Congratulations—your Oxygen Pro now has the latest Firmware!

macOS Update Instructions

> **IMPORTANT:** Close all open applications on the computer you will be using to perform the update.

> **IMPORTANT:** Use the Oxygen Pro Preset Editor to backup and save any Presets or DAW presets you've created. This update will revert your Oxygen Pro to its factory settings.

1. Connect your Oxygen Pro keyboard to your computer's USB port and ensure Oxygen Pro is **powered off** and your computer is **powered on**.

2. On your Oxygen Pro keyboard, press and hold the **SHIFT, BANK <, and BANK >** buttons, and while continuing to press and hold the buttons, power on your Oxygen Pro.

   - **Notice:** Your Oxygen Pro will now display "**Oxygen Series Updating**" on its screen.

3. Double-click the **Oxygen Pro ## Firmware Updater 1.0.0.dmg**. You will then see a window where you can drag the updater into the Applications folder. Since this is a single-use app, you may wish to directly open it from this window rather than adding it to the Applications folder.

4. Double-click the **Oxygen Pro ## Firmware Updater v1.0.0** app. A window may appear asking if you would like to open the application. Click "Open".

5. Once the **Oxygen Pro Firmware Updater** is open, click the folder icon and then locate and select the **Oxygen Pro ##_V2.1.2** file.

6. In the **Oxygen Pro Series Firmware Updater**, select "Update".

7. After the updater confirms the update is successfully completed, click "OK".

8. Power off your Oxygen Pro keyboard.

9. On your Oxygen Pro keyboard, press and hold the **Octave – and +** buttons, and while continuing to press and hold the buttons, power on your Oxygen Pro.

   Congratulations—your Oxygen Pro now has the latest Firmware!
